## Languages

English (Advanced)  
Spanish (Elementary)  
Portuguese (Native or Bilingual)

## Certifications

FIAP Certificate in System  
Analysis and Web Prototyping

FIAP Certificate in Web 2.0  
Development and Design

Spring Boot 3: Develop a Restful  
API in Java

SQL with Oracle Database:  
Manipulate and Query Data

HTML and CSS: mobile-first  
responsiveness

JavaScript for the Web:  
Creating Dynamic Pages

Git and GitHub: repository,  
commit and version control

Responsive Web  
Development

Santander Bootcamp 2023 -  
Fullstack Java+Angular

# Vinicius Leonel

## Software Developer

Guarulhos, São Paulo, Brasil

Currently studying System Development and Analysis at FIAP.

Web development & Programming Skills:

### Backend - Java / Spring / Docker

Development of robust and scalable APIs using Spring Boot, Docker, JWT, Swagger, Hibernate, and PostgreSQL. Creation of RESTful endpoints, configuration of security with JWT, interactive documentation with Swagger, and containerization with Docker to ensure consistency across environments. Hibernate and JPA were used for object-relational mapping and Flyway for database schema version management.

### Frontend - Next.js / TypeScript / React

Development of modern and responsive web applications using Next.js and React. Next.js offers optimized performance, pre-rendering of pages, simplified routing, and SSR (Server-Side Rendering) support. React provides an efficient way to build interactive and reusable user interfaces, facilitating code development and maintenance. TypeScript was used for static typing, aiding in error detection during development and improving code maintainability.

### Mobile - Kotlin

Development in Kotlin and Java for Android applications, with a focus on Jetpack Compose to create modern and dynamic user interfaces. Implementation of architectures such as MVVM and integrating RESTful APIs to retrieve backend data.

### Banco de Dados - Oracle / MySQL / Postgres...

Development and management of database systems using Oracle, PostgreSQL, MySQL, Hibernate, and Prisma. Designing and modeling database schemas, creating and optimizing SQL queries, and implementing object-relational mapping (ORM) with Hibernate, JPA, and Prisma. Migration tools such as Flyway were used to ensure consistent database schema versions.

**Others:**

- HTML, CSS, JavaScript, NodeJS, Angular, Tailwind, Python, Docker.

---

## **Education**

### **FIAP**

System Development and Analysis -  
(February 2023 - December 2024)

Professional Qualification Certificate in Systems Analysis and  
Web Prototyping

Professional Qualification Certificate in Analysis and Web 2.0  
Design

### **Infinity English College**

Certification in ESOL international Speaking and Listening  
(English)

CEFR Level B2.1 (2017 - 2018)

### **Exchange Program – Dublin Ireland**

Julho 2017 - Novembro 2018 (1 ano 5 meses)

Swords, County Dublin, Ireland

I completed an 18-month exchange program in Dublin, Ireland, during which I dedicated my time to enhancing my English proficiency, as well as refining my communication and customer service skills.
